

CONTRIBUTION GUIDE

Step 1: Make an account on Github: <https://github.com>

Step 2: Register yourself for Hacktoberfest:

<https://hacktoberfest.digitalocean.com/register>

Step 3: Contribute to GDSC's hacktoberfest repository!

<https://github.com/GDSC-BVP-ND/hacktoberfest>

Step 4: After 4 successful PRs, win a free limited edition T-shirt!

How to contributing to GDSC repository:

<https://github.com/GDSC-BVP-ND/hacktoberfest>

1. Fork and clone the repository ([instructions](#))
2. Build a project on one of the subdomains:
Machine Learning, C++, Python, Java, Data Structure & Algorithms
(example: chess-game in python)
3. After you have the repository cloned on your system, add your project in the directory/folder of your subdomain.
4. Commit and push your changes ([instructions](#))
5. Open a pull request (PR), explaining what your project does ([instructions](#))
6. Add more projects and open a pull requests for each of them.

Important Note: Your PR would be approved when the GDSC project maintainers add a "[hacktoberfest-accepted](#)" label.
